DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I (claims 1-9) in the reply filed on 7/7/05 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Schön et al. (non-patent literature).

Re claim 1, Schon et al. disclose a substrate having a planar surface; first and second electrodes (doped Si/drain-Au) located on said planar surface, said first electrode having a top surface and a lateral surface, said lateral surface having an edge near or in contact with said substrate; an electrode insulating layer located on said top surface (SiO₂); a self-assembled layer located on said lateral surface; and wherein said second electrode (drain-Au) is in contact with both said self-assembled layer and said electrode insulating layer (See fig. 1).

Allowable Subject Matter

Claims 2-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
